This book started its life as my lecture notes for Math 444 at the University of Illinois at Urbana-Champaign (UIUC) in the fall semester of 2009, and was later enhanced to teach Math 521 at University of Wisconsin-Madison (UW-Madison). A prerequisite for the course is a basic proof course. However, for a noise signal to carry no information, it must be white with a flat spectrum and an autocorrelation function (ACF) equal to an impulse3. Most real noise is not really white, but colored in some respect. In fact, the term noise is often used rather loosely and is frequently used to describe signal contamination.
