A gene is a segment of a DNA molecule that codes for a specific protein involved in a specific biological function. Generally a gene is inactive, but when it is active, it is expressed via the process: DNA mRNA protein. transcription translation.

Microarray and Other High ... - DNA microarrays DNA microarray technology is one of the most promising tools for obtaining gene expression data. A DNA microarray is a tiny glass slide on which genes (purified single-stranded cDNA sequences in solution) have been robotically spotted in an (approximately) rectangular array.
