Read honest and unbiased product reviews from our users. Amazon.com: Customer reviews: Fall Fever: A Teacher's Journal - A fever is a body temperature that is higher than normal. A normal temperature can vary from person to person, but it is usually around 98.6 F. A fever is not a disease. It is usually a sign that your body is trying to fight an illness or infection. Infections cause most fevers. You get a fever because your body is trying to kill the virus or bacteria that caused the infection. Fever: MedlinePlus -
