Sat, 12 Jan 2019 13:16:00 GMT TURBOMOLE Release Notes - COSMOlogic - Predicting Solutions - In physics, the n-body problem is the problem of predicting the individual motions of a group of celestial objects interacting with each other gravitationally. Solving this problem has been motivated by the desire to understand the motions of the Sun, Moon, planets, and visible stars. In the 20th century, understanding the dynamics of globular cluster star systems became an important n-body ...
