Wed, 11 Dec 2013 23:59:00 GMT faster than light superluminal loopholes pdf - No-communication theorem. When a signal is sent from one location and received at another location, then as long as the signal is moving at the speed of light or slower, the mathematics of simultaneity in the theory of relativity show that all reference frames agree that the transmission-event happened before the reception-event. When the signal travels faster than light, it is received before ... Tue, 15 Jan 2019 22:52:00 GMT Time travel - Wikipedia - A collapse of the universe will happen if a bubble forms in the universe where the Higgs particle-associated Higgs-field will reach a different value than the rest of the universe. If this new ... Mon, 14 Sep 2015 23:56:00 GMT Collapse of the universe is closer than ever before - Phys.org - Quantum entanglement is a physical phenomenon which occurs when pairs or groups of particles are generated, interact, or share spatial proximity in ways such that the quantum state of each particle cannot be described independently of the state of the other(s), even when the particles are separated by a large distanceâ€”instead, a quantum state must be described for the system as a whole. inequality violation finally done rightâ€• Mike Says: Comment #1 September 15th, 2015 at 2:36 pm. No it will not convince everyone that local realism is dead, but not because of this â€œloophole-freeâ€• Bell test. Mon, 14 Jan 2019 16:48:00 GMT Bell inequality violation finally done right - Scott Aaronson - WurmlÃ¶cher. Ein damit verwandter Effekt ist das Durchqueren sogenannter WurmlÃ¶cher, das oft in Science-Fiction-Romanen verwendet wird. Dabei bewegt sich ein Raumschiff lokal zwar nicht schneller als mit Lichtgeschwindigkeit, es nimmt aber im gekrÃ¼mmten Raum eine AbkÃ¼rzung, so dass es am Ende doch schneller als das Licht am Ziel ankommt.
