The integral equation (EFIE) we The Method of Moments in Electromagnetics - GMT field computation by moment methods pdf - An object with an electric dipole moment is subject to a torque $\vec{\tau} = \vec{p} \times \vec{E}$ when placed in an external electric field. The torque tends to align the dipole with the field. A dipole aligned parallel to an electric field has lower potential energy than a Field Computation By Moment Methods Ieee Oup Series On ... -
