

Mon, 14 Oct 2013 23:56:00 GMT field guide to binoculars and pdf - Binoculars or field glasses are two telescopes mounted side-by-side and aligned to point in the same direction, allowing the viewer to use both eyes (binocular vision) when viewing distant objects. Most are sized to be held using both hands, although sizes vary widely from opera glasses to large pedestal mounted military models.. Unlike a telescope, binoculars give users a three-dimensional ... Thu, 17 Jan 2019 10:54:00 GMT Binoculars - Wikipedia - Two of the important measurements you see on binocular specifications are Field of View and Close Focus (defined below). Whereas power and objective lens size determine how big and bright your image will be, field of view and close focus determine how much of the world youâ€™ll be able to see through your binoculars.
