GMT human anatomy  
physiology laboratory  
manual pdf - The human  
brain is the central organ of  
the human nervous system,  
and with the spinal cord  
makes up the central  
nervous system. The brain  
consists of the cerebrum,  
the brainstem and the  
cerebellum. It controls most  
of the activities of the body,  
processing, integrating, and  
coordinating the  
information it receives from  
the sense organs, and  
making decisions as to the  
instructions sent to the ...

Human brain - Wikipedia -

The human heart is situated  
in the middle mediastinum,  
at the level of thoracic  
vertebrae T5-T8. A  
double-membraned sac  
called the pericardium  
surrounds the heart and  
attaches to the  
mediastinum. The back  
surface of the heart lies near  
the vertebral column, and  
the front surface sits behind  
the sternum and rib  
cartilages. The upper part of  
the heart is the attachment  
point for several large ...
